Description:
Pittsburgh is home to over 26,000 foreign-born residents and 4,500 refugees who have resettled in the last decade. The refugee population in Pittsburgh includes members from Bhutan, Burma, Somalia, Iraq, the Democratic Republic of Congo, and Syria. As these refugees reside permanently in the U.S., they face unique health challenges such as psychological trauma from conflict and displacement, language and cultural barriers, and understanding of the U.S. healthcare system. Through hands-on experiences and community field trips, this course introduces medical students to the basic health requirements of refugees living in Pittsburgh and brings awareness to some of their access barriers and available resources.

Course Objectives:
1. Describe the health and cultural profiles of key refugee groups in Pittsburgh, focusing on current health needs and priority health conditions
2. Recognize health care access and challenges refugees face navigating the US health care system and access community resources to help refugees overcome barriers to care
3. Identify various health and social services agencies that are involved in resettling refugees
4. Describe the common physical and psychological issues affecting refugees such as PTSD and how these are affected by resettlement
5. Communicate effectively with patients from different cultural and linguistic backgrounds, including the use of interpreters
6. Develop interpersonal skills and a deeper understanding of refugees by having in-person experiences with members of the refugee population
Requirements:
Attend all 4 sessions and read the brief assignment for each session

COURSE OUTLINE:
Refugee Health Mini-Elective

LOCATION: Session 1 & 2- Scaife Hall, Session 3- SHIM, Session 4- SHHC

Session 1: Overview of Refugee Health and Refugee Services in Pittsburgh (1/10)
Students will have the opportunity to first hear from Dr. Bui, an expert on refugee health in Pitts-
burgh, about an overview and unique challenges of the refugee population in Pittsburgh. After a brief
presentation, the session will be discussion-based and student-centered. Other topics discussed will
include the blue interpreter phone, cultural sensitivity and adjustments based on ethnicity (ex. in the
Arab culture, physical contact in the form of a handshake is considered disrespectful), and providing
refugee patients with appropriate resources for mental, emotional, and community needs.
Reading: Crosby SS. Primary Care Management of non-English-speaking refugees who have ex-
perienced trauma. A clinical review. JAMA 2013; 310(5):519-528

Session 2: Movie Screening and Discussion (1/17)
Documentary Discussion Students will watch a short documentary and have a discussion afterwards.
There will be a cultural potluck in order to spread cultural awareness amongst the students.

Session 3: South Hills Interfaith Movement (SHIM) Support Group (1/31)
Students will visit SHIM to work directly with middle school and high school refugee girls. Students
will learn about SHIM’s work and involvement and participate in activities for the evening. This could
include any programs on yoga, cooking healthy meals, mentoring and addressing mental health. Vol-
unteer opportunities will also be discussed.

Session 4: Navigating Healthcare for Refugee Population (Individual session: TBD)
Students will have an opportunity to go to the Squirrel Hill Health Center (SHHC) to talk to healthcare
providers for the refugee population and learn about common themes in working with refugee pa-
tients. Space and time permitting, students will also be able to shadow one of the healthcare provid-
ers at SHHC to gain a further insight on the unique challenges and health issues that refugees face in
navigating the healthcare system in the United States.
