<tr>
<td>Description:</td>
<td>The Healer’s Art addresses the hidden crisis in medicine, the growing loss of meaning and commitment experience by physicians nationwide under the stresses of today’s health care system. The Healer’s Art is a process-based curriculum that enables the formation of a community of inquiry between students and faculty. It takes a highly innovative, interactive, contemplative and didactic approach to enabling students to perceive the personal and universal meaning in their daily experience of medicine. The course consists of five three-hour evening sessions spaced roughly two weeks apart, each divided into large-group presentations, and small-group discussions and exercises.</td>

</table>

**Objectives:**
The Healer's Art course will encourage students to:
- Identify, strengthen and cultivate the human dimensions of the practice of Medicine. Recognize the commonality of personal concerns among their peers, and gain support for personal development from peers and faculty.
- Accept the universality of loss and pain.
- Recognize grief as a self-care strategy for physicians, and identify strategies and tools of grieving.
- Trust the power of listening and presence to heal others.

**Requirements:**
- Participate in all 5 course sessions.
- Because of the experiential and process nature of this course, students are required to attend all sessions.
- A supplemental text is recommended but there are no required readings or out of class assignments.
