

PittMed Professionalism Accolade

CONGRATULATIONS!

“...I am writing to let you know how amazing our medical students and interns were this block. Each team member went above and beyond to care for our patients...

Christopher Hensler
Student, MS4

-We had a patient ... that required a biologic to prevent vision loss. Manufacturing of this biologic was paused due to the Pandemic. Chris contacted the manufacturer directly and in coordination with the patient's endocrinologist to expedite home infusion.

-Chris established such close rapport with one of his patient's that she disclosed that she was being abused by her caretakers. Chris was able to file a report with the state to initiate further investigation. The patient did not disclose of this to the rest of us.”
