

PittMed Professionalism Accolade

CONGRATULATIONS!

“...I am writing to let you know how amazing our medical students and interns were this block. Each team member went above and beyond to care for our patients.

Edward Sim
Student, MS4

- We were about to discharge one of Ed's patient's and they patient had many questions and needed additional anticipatory guidance. The patient explicitly asked the nurse to get Ed to address her concerns.**
- We had a patient that was admitted to us after an overdose +/- SI attempt. Ed established such close rapport with the patient that he disclosed his substance use and abuse by his father to Ed and not to the rest of us.**
- Ed updated families on his day off and requested to come into work to be at family meetings on his day off.”**
