The Emergency Expert Professional Enrichment Course 2021-2022

<u>Course Dates:</u>	September 2021—March 2022 12:00-1:00 PM
<u>Class Year:</u>	MS1 and MS2
<u>Course Director:</u>	Stephanie Gonzalez, MD Department of Emergency Medicine
<u>Faculty:</u>	Stephanie Gonzalez, MD Adam Tobias, MD Raquel Forsythe, MD Michael Lynch, MD Joshua Shulman, MD Michael Abesamis, MD Jennifer Wolford, DO
<u>Contact Information:</u>	Stephanie Gonzalez, MD 412-647-9922 gonzalezsm@upmc.edu

Registration:

No need to pre-register. Lectures will be announced by EM Student Association Coordinators. Be sure to sign in when attending lecture.

Description:

This 6 session professional enrichment course will introduce students to the field of Emergency Medicine and various sub-specialties with an emphasis on emergent care of the critically ill or injured patient. This noon-time lecture series is sponsored by the Emergency Medicine Student Association and will cover various topics relevant to Emergency Medicine and various emergency situations. Topics will include an introduction to addiction medicine, intimate partner violence, trauma management, child maltreatment, toxicology and In-flight emergencies. Lectures include pathophysiology and clinical correlation. The lecturers are all board-certified faculty members or fellows within the University of Pittsburgh Medical Center.

Objectives:

- To provide framework of skills needed in the care of the critically ill or injured patient and various emergency situations.
- To expose students to the field of EM and provide information on the wide range of practice opportunities and sub-specialties available.
- To provide a foundation to apply pathophysiology to actual clinical cases.
- To provide practical knowledge of emergency scenarios relevant to Emergency Medicine but applicable to a diverse range of medical specialties.

Requirements:

Participate in 4 out of 6 offered course sessions

Course Outline

The Emergency Expert

Time/Location: All sessions: Scaife Hall Lectures Rooms
12:00 PM—1:00 PM

Faculty:

Stephanie Gonzalez, MD

Session 1- Thursday, September 2, 2021

"Is There a Doctor on Board? Medical Emergencies at 30,000 Feet"

Dr. Adam Tobias, MD

"Ladies and gentlemen: is there a doctor on board?" We will use recordings of real-life in-flight emergency consults to supplement a discussion of common and uncommon scenarios that medical providers may be challenged with during commercial airline travel. We will discuss the unique aspects of patient care in this austere environment, what supplies and resources are available, the medical challenges of taking care of patients at altitude, considerations for aircraft diversion, and how you can help.

Session 2 – Thursday, October 21, 2021

Addiction Medicine

Dr. Michael Lynch, MD

Learn about evaluation and treatment of substance use disorders in the ED: screening, acute management, harm reduction and transition to ongoing care.

Session 3 – Thursday, November 18, 2021

Trauma Management

Dr. Raquel Forsyth, MD

Learn about initial management principles of trauma patients. The focus of the lecture will be actual case studies of trauma patients focusing on mechanism of injury, anatomy and physical findings, diagnostic evaluation and clinical decision making.

Session 4- Thursday, January 13, 2022

Toxicology—Toxidromes

Dr. Joshua Shulman, MD

The pathophysiology of common toxidromes will be discussed with an emphasis on clinical presentation. Using a case-based approach, students will learn about the pharmacology, physical exam findings and clinical management of various classes of toxic ingestions.

Session 5- Thursday, February 17, 2022

Child Maltreatment

Dr. Jennifer Wolford, DO

Participants will have an understanding of the scope of the problem of child maltreatment and will become more familiar with legal aspects and the child protection system. Students will also gain insight into ways abused and neglected children present in the ED setting.

Session 6- Thursday, March 3, 2022

Toxicology-Bites, Stings and Envenomations

Dr. Michael Abesamis, MD

This talk will cover common and life-threatening bites, stings and envenomations. Clinical presentation, pathophysiology, management and outcomes will be discussed in the context of actual cases and photographs.
