

PittMed Professionalism Accolade

CONGRATULATIONS!

Stephanie Hum, MD
MS4 Student

"Student leaders organizing volunteers for the 9th St Clinic received a request for an MS4 interested in primary care to help the clinic staff launch their new telemedicine service, as this is an entirely new service for them to offer their patients and many staff were unfamiliar with the technology. Stephanie Hum volunteered right away and will be continuing to volunteer at the clinic weekly until she leaves for her residency in Denver. This is an example of exceptional professionalism because she is volunteering her time, is not receiving any type of clinical credit, is expanding her role as a medical student by also providing tech support, and is making a commitment to return to help the clinic all the way up until she moves for her residency."
