

PittMed Professionalism Accolade

CONGRATULATIONS!

Marissa Baron

MS4

"Marissa was an excellent role model and mentor during my time on the Antepartum service at Magee Women's Hospital. I observed her on several occasions discussing birth control plans with patients and she demonstrated consideration and care vital to any great health care professional. She sat down with the patient, indicating that she was not in a rush and was open to any level of discussion the patient required. She also gave the patient a lot of space to think about birth control options and did not make the patient feel rushed at all. After the patient encounter, she answered questions that I had and went out of her way to teach me things. She excelled at her role both as a sub-I, mentor, and teacher on this and many other instances during the week."
