

PittMed Professionalism Accolade

CONGRATULATIONS!

Caitlin McNamara, MD

Resident, PGY-3

Department of Pediatrics

“Dr. McNamara is the kind of physician I want to be one day. She created such a positive space for learners and encouraged us to think critically about the science, the reasoning, and the psychosocial factors involved in pediatric disease management. Everyday she sat down with us to teach a core clinical lesson for our level of training. She set goals for us to learn components of the physical exam/patient interview and made specific goals unique to our individual development to work on each day. It was extremely encouraging to see Dr. McNamara's excitement for us when she gave us feedback about our improvement. I feel like Dr. McNamara is a teacher, as well as an advocate for her trainees, and she deserves recognition for the positive learning environment she creates.”
